Building an Angular Application with Node and Token Authentication

SETTING UP OUR ENVIRONMENT

Alexander Zanfir
AUTHOR/DEVELOPER

@alexzanderzan

Overview

Front End with Angular v.4+

Backend with Node

MongoDB

ExpressJS

Authentication

Authorization

How Will I Teach This Course

Test Frequently

Type and test frequently = reduce errors

Example First

Get code working, or failing, then theory

What You Will Get out of This Course

Mean

Learn front end and backend

Authentication

Learn how to identify users and secure resources

Demo App

Make your own custom app

Architecture

Backend

Node, Express, Mongo

Frontend

Angular
